School Construction Update

An important part of our county’s educational infrastructure is school facilities. With our dynamic student enrollment and aging facilities, there’s an ongoing need for school construction. Many of our school districts have schools currently under construction or have completed construction projects during the past 12 months. Funds to construct and equip these projects come from four primary sources: bonds from the State School Building Program, local general obligation bonds, development fees assessed on new construction, and financing at the local level.

Pass Region
